ASSESSA's raw materials:

PLUGIN GS is the result of a careful balance of 100% natural extracts, monoesters, triglycerides and squalane that mimic sebum and restore the lipid balance of dry, fragile and/or damaged hair, in addition to promoting protection against split ends.

FRULIX LICHIA it organizes the fiber surface and the alignment of the cuticles, ensuring a more uniform and disciplined appearance. This organization of the hair surface is facilitated by a composition rich in sugars, oligosaccharides, amino acids, low-molecular-weight peptides, and organic acids, which help modulate the pH and regulate how the hair strand interacts with moisture. The result is alignment combined with lightness: hair that is more organized and flexible, with natural movement.
