The formulation was developed and tested in our laboratories using the specified ingredients and percentages. Assessa is not responsible for changes that may occur due to modifications made without further testing. It is the client's responsibility to verify the stability of the formula to ensure its safety and compliance with the laws and patents applicable in the country where the finished product will be used.

PROCEDURE: Add phase A to a container and mix until dissolved. Mix phase B beforehand and gradually add at room temperature with stirring, heat until heated to 85°C. With a temperature of 85°C, homogenize for 20 min with vigorous stirring. Add phase C and mix for 10 min. Add phase D and stir for 10 min. Then, add phase E and mix for 10 min. It starts to cool. At 70°C add phase F and stir for 5 min. Below 40°C add phases G, H, and I, respectively, with 5 min between each phase. Adjust the pH with phase J.

ASSESSA's raw materials:

THE CARBOGREEN PLATFORM allows us to make natural, biodegradable hydrogels with a unique sensory profile. Here, CARBOGREEN QB provides a soft touch and glide to the hair and quick drying.

PLUGIN GS is the result of a careful balance of 100% natural extracts, monoesters, triglycerides and squalane that mimic sebum and restore the lipid balance of dry, fragile and/or damaged hair, in addition to promoting protection against split ends.

ZINBLOQ protects hair from environmental damage by preserving the cuticle and reducing oxidative stress for stronger, healthier hair.

ACTIMULSI GA20 is a natural multifunctional bioactive derived from the scar exudate of Acacia senegal, which improves the sensorial properties of formulas, providing a soft touch.
