

SKINCARE

REPAIR, TREATMENT AND PREVENTION

ASSESSA

INNOVATION FOR A GREENER WORLD

SKINCARE LINE

As the first line of defense, the skin suffers all kinds of everyday traumas and endures the marks of the environment in which we live and our lifestyles. ASSESSA in-

redients interact synergistically with epidermis proteins, activating biological responses that result in a profound and differentiated cosmetic effect on the skin.

REPAIR

NEOBERRY PREVENTS AND REVERSES GLYCATION

NEOBERRY actively prevents and reverses early signs of glycation damage. It stimulates Collagen I production, strengthening the skin's extracellular matrix and promoting a youthful appearance.

- Reverses sugar induced aging
- Boost the skin's natural collagen production
- Reverts the generation of glycated products
- Superior performance to L-Carnosine and Aminoguanidine
- Preservative-free, encapsulated and natural product.

QUIDGEL BRM IMMUNOSTIMULANT AND REPAIR

QUIDGEL BRM activates the skin's immune system, increasing its defense capacity and natural ability to repair itself, rebalancing functionality, and restoring firmness and a healthy appearance in mature skin.

- Activate the skin's immune system
- Reduces collagen degradation
- Stimulates the natural protection of the skin.
- Recovers the structure of the epidermis.
- Stimulates fibroblasts to produce collagen and elastin.

HYPKIN POWERFUL SKIN REGENERATING AGENT

Gene expression assays show that HYPKIN modulates 507 genes in human keratinocytes and fibroblasts demonstrating an intense activity in the skin dermis and epidermis. The genetic roadmap confirmed by clinical trials shows a powerful skin regenerating activity.

- Increases cell turnover/cellular renovation
- Reduces and lightens dark spots
- Improves the homogeneity of skin tone
- Stimulates microcirculation
- Stimulates the synthesis of the dermal matrix
- Improves skin structure, density, and firmness
- Reduces size, depth, and number of wrinkles
- Smooths the microrelief and improves the texture of the skin.

QUIDITAT NWP EXPOSOME SKIN PROTECTION

It is a high-performance ingredient composed of active cucumber biomolecules, enhanced by synergy with a polymeric network of marine algae polysaccharides.

- Exposome shield
- Anti-Pollution / Urban Pollution
- Reduces smoke-induced inflammation response
- Reduces pollution-induced skin damage
- Powerful soothing effect against physical and chemical aggressors on the skin.

TREATMENT

QUIDITAT SRC

ISOTONIC, STIMULATES COLLAGEN PRODUCTION

Wholly green coconut water-based bioactive ingredient vectorized with sulfated polysaccharides obtained from marine algae.

- Stimulates the production of fibroblasts.
- Stimulates the production of type I collagen.
- Reconditions and moisturizes damaged skin.
- It has anti-inflammatory, protecting and body-namizing properties

ORMAGEL SH

REDUCES IRRITATION AND HYDRATES THE SKIN

A high-performance marine bioactive ingredient developed through the combination of red and brown algae in a formulated proportion for maximum effect.

- Reduces skin irritation
- Increases skin firmness, protection & moisturizing
- Reduces mush and mass loss in soaps.
- Increases creaminess and foam volume in bar soaps.

NUTLIX COCO

IMPROVES HYDRATION & FIRMNESS OF THE SKIN

It's a perfectly balanced combination between a selected fraction of eco-friendly coconut water and extra virgin organic coconut oil, creating a unique product that moisturizes and improves skin firmness.

- Increases skin hydration after two hours.
- Decreases the level of TEWL rate after 2 hours.
- Improves skin elasticity and firmness.

ACTIMULSIGA20

NATURAL CO-EMULSIFIER, MULTIFUNCTIONAL

Natural multifunctional bioactive derived from the scar of Acacia Senegal exudate.

- Soothing and anti-inflammatory action.
- Recommended for sensitive skin formulations.
- Acts as a co-emulsifier in cosmetic formulas reducing the need to use synthetic emulsifiers.
- Dry and velvety touch on the skin.

PLUGIN GS

NATURAL SUBSTITUTE FOR SILICONE D5

It combines unique combination of sunflower, chia, and jojoba oil with a composition similar to human skin sebum. As a result, it has identical attributes to the D5 Silicone, without the restrictions of a synthetic ingredient.

- Excellent spreadability and slippery properties.
- Formation of a velvety film on the skin.
- Immediate gloss on skin.
- No white residue.

QUIDITAT NWA+

MOISTURIZER AND SOOTHING ACTIVITY

It's a synergic association of marine algae biopolymers with polysaccharides of Aloe Barbadosis. This association forms an interpenetrating mesh that combines the cicatrizing, moisturizing, anti-inflammatory, and protective properties of the actives.

- Twice as active as pure Aloe.
- Powerful moisturizer with soothing action.

FLORLIK ROSE

ANTIOXIDANT AND ANTI-INFLAMMATORY

Produced from fresh rose petals in a process without the addition of synthetic solvents, modifying and transforming them into a liquid containing all the flower's bioactive components.

- Antioxidant activity.
- Anti-inflammatory activity.
- Astringent action.

TEXTURES

CARBOGREEN PLATFORM

(CARBOGREEN QB • CARBOGREEN EI • CARBOGREEN EA • CARBOGREEN EO)

CARBOGREEN is a texturizer that presents extraordinary sensory in the skin and hair. It has fast drying, film formation, and excellent spreadability. When in associa-

tion, **CARBOGREEN** platform's products increases the viscosity of cosmetic formulas, allowing the exploration of a great variety of textures. With the **CARBOGREEN** plat-

form, it is possible to formulate different textures such as serums, gel creams, and light emulsions up to a thick cream, meeting all your final product's needs.

PREVENTION

FLOWER POWER HIBISCUS

YOUTH AND VITALITY FOR SENESCENT CELLS

FP HIBISCUS was created from petals and buds of *Hibiscus sabdariffa* encapsulated with polymers from *Acacia senegal*. It is a stable, dry, preservative-free ingredient with high biological activity for the care of aged skin.

- Rejuvenates senescent cells, restoring their vitality and functionality
- Increases anti-senescence markers SIRT1 and SIRT3 in aged cells.
- Increases collagen synthesis in senescent fibroblasts at concentrations below 0.01%.

DERMAFENSE TGU

BROAD SPECTRUM AND ANTIOXIDANT ACTIVITY

An antioxidant made from specific fractions of grape, guava, and wheat, rich in substances with powerful biostimulant activity. As a result, it has an exceptional ability to protect against free radicals.

- Prevents skin aging caused by oxidative stress.
- Captures free radicals before they penetrate cells.
- Stimulates the cells' internal defense systems.
- Full protection against free radicals.
