

QUIDEX® 3.2

THE REVOLUTION IN PERFUMES MANUFACTURING

NATURAL
ORIGIN
100%

HOW QUIDEX® 3.2 WORKS?

QUIDEX® 3.2 reacts with contaminants and undesirable components of the alcoholic solution, accelerating the process of manufacturing by removing selectively the volatile substances responsible for blocking olfactory receptor cells.

INNOVATION FOR A GREENER WORLD

MANUFACTURING PERFUMES IN A **FAST & EASY WAY**

The traditional process of perfume manufacturing may be a time and energy-intensive process. Such complexity leads to different problems, such as high inventory, insurance, and capital costs. Furthermore, reacting to unexpected sales may be difficult, mainly when you are still processing your new batch. On top of that, expanding your production capacity may be an issue, considering the investment needed for additional space and equipment.

WHAT IS QUIDEX® 3.2?

QUIDEX® 3.2 is a technology that dramatically reduces perfume production time. It is the combination of highly reactive biopolymers from botanical origin and mesh-forming molecules.

QUIDEX® 3.2 doesn't change olfactory characteristics of the fragrances and allows manufacturers to have a perfume with superior quality and sensory in a fast, clean and simple way.

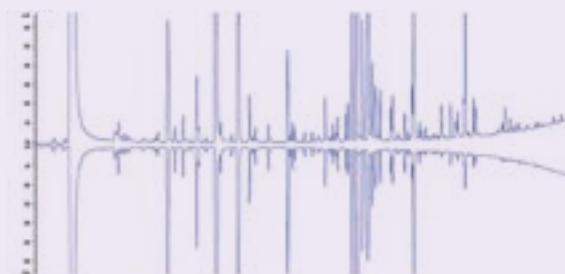

QUIDEX® 3.2

THE REVOLUTION IN PERFUMES MANUFACTURING

TIME FOR MANUFACTURING

TYPE	FRAGRANCE CONCENTRATION	PROCESSING TIME (QUIDEX 0.5% CONCENTRATION)
Parfum	20-25%	3 to 6 hours
Eau de Parfum	12-18%	3 to 6 hours
Body Splash	5-8%	3 to 6 hours
Fragrance Diffuser	3-5%	3 to 6 hours

CROMATOGRAPHY

Tests show that QUIDEX® 3.2 doesn't change the perfume.

OLFATIVES TESTS

According to trained panelists and perfumers, fragrances tested have no statistical difference when using the original process or QUIDEX® 3.2.

formulate with
Quidex 3.2

QUIDEX® 3.2 MEANS

- Less capital in stock, alcohol and equipment.
- Unexpected sale met quickly.
- Lower production costs.
- Manufacturing perfumes in a clean, fast and green way.
- No label changes.

QUIDEX® 3.2 IS

CLEAN: 100% removed from fragrance. No residues in the final product.

FAST: Easy to incorporate into hydroalcoholic solutions and easily removed by filtration. The entire process takes up 6 hours to complete.

GREEN: Made with 100% natural ingredients.
