**PROCEDURE:** Add phase A in a recipient and start to stir till dissolution. Add gradually phase B at room temperature with stir, heat till 80 °C. Add phase C in a recipient and heat till 80 °C. When both phases are at 80 °C, add phase C in a mix of phases A+B. Stir for 5 min and start to cool. After 30 °C add phases D, E, F, G, H, I and J, respectively, with 5 min between each phase. **pH: 4.5 – 5.5.** Formulation developed and tested in our laboratories with the ingredients and quantities described. ASSESSA is not responsible for changes that may occur due to adaptations without additional tests. (\*) Consult the different preservative systems available. It is not included in INCI.
