**PROCEDURE:** Add phase **A** to a container and start stirring. Heat to 80 - 85 °C, until it's all melted. Add phase **B** and then phase **C**. After everything is homogeneous, add the formulation in a mold and let it cool. When it solidifies, remove the conditioner bar from the mold. **FORMULA SPECIFICATION:** pH: 3,0 - 4,0.

Formulation developed and tested in our laboratories with the ingredients and quantities described. ASSESSA is not responsible for changes that may occur due to adaptations without additional tests.
